

Remya Mudliar
Senior Manager
Tata Business Excellence Group

Remya Mudliar, as part of the Tata Business Excellence Group, is responsible for delivering Capability Building interventions under Data Excellence for Tata companies. In this role, she leads the design, planning, and execution of multiple training programmes on the TCS Datom™ Framework and Data Excellence Assessment process. These programmes are designed with the objective to facilitate Tata companies in their Data Excellence journey, as well as to create a pool of Data Excellence Assessors and Practitioners within these companies. Additionally, she supports the team with various interventions aimed at developing the ecosystem and creating a traction for data-driven excellence within Tata companies.

With over a decade spent within the Tata Group, in her earlier roles, she has worked across various functions and work levels of Tata Power, with over 8 years of experience in driving Business Excellence interventions within the Tata Power Group. Her expertise includes facilitating and supporting business operations and corporate functions in their Process Management, Benchmarking, Knowledge Management, and Continuous Improvement efforts to deliver business value. She was also part of the Innovation Council that works towards developing new use cases and business solutions for revenue maximisation.

Remya holds a Master's degree in business administration from University of Petroleum & Energy Studies and has a Bachelor's degree in Instrumentation and Control Engineering from Gujarat University. She is also a trained Data Analyst, through Tata Power's in-house Academy for Advanced Analytics, and is a certified TBEM and Data Excellence Assessor.
